

ILC Surveyors: This following companies are being sent as a convenience to realtors and buyers/sellers; it is not intended as a preference or a requirement. Any licensed surveyor is perfectly acceptable to fulfill the ILC requirement. These are the companies the District has used over the past decade for surveying common areas and for Improvement Location Certificates on District owned properties. Private homeowners have also used these companies. We recommend obtaining a few estimates and basing your decision on price and availability. The price of an ILC performed in early 2020 was approximately \$350. We also suggest researching with the GIS department just in case an older ILC was performed. The District accepts any ILC that shows the home as a reference point, even if further improvements have been added since. Please contact Janet Anderson with any questions: 970-259-4267/970-946-2310, dw1@mydurango.net
