Independent Auditor's Report

The Governing Body Durango West Metropolitan District No. 1

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of Durango West Metropolitan District No. 1 ("the District"), as of and for the year ended December 31, 2017, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

The District's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the wastewater fund, which represent 48.5 percent, 33.3 percent, and 19.1 percent, respectively, of the assets, net position, and revenues of the business-type activities. Those financial statements were audited by other auditors whose report thereon has been furnished to us, and our opinion, insofar as it relates to the amounts included for the District, is based solely on the report of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the report of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the District, as of December 31, 2017, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis and budgetary comparison schedules on pages iii-vii and on page 29 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The other supplementary information is presented for purposes of additional analysis and are not a required part of the basic financial statements.

The other supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and the other auditors. In our opinion, the other supplementary information is fairly stated in all material respects in relation to the basic financial statements as a whole.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Management of Durango West Metropolitan District No. 1 (the District) offers readers of our financial statements the following narrative overview and analysis of our financial activities for the year ended December 31, 2017.

This section provides a summary of the District's financial performance. It contains an overview and analysis of the District's financial activities for the year ended December 31, 2017. The financial statements are an integral part of this analysis and are contained within this document.

FINANCIAL HIGHLIGHTS

- 1. The District's net position totals \$1,956,669
- 2. Operating expenses of \$756,702 were more than program revenues of \$603,679 by \$153,023.
- 3. General revenues total \$158,666.

OVERVIEW OF THE FINANCIAL STATEMENTS

The financial statements consist of four parts: management's discussion and analysis, basic financial statements, required supplementary information and other supplementary information.

BASIC FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Durango West Metropolitan District No. 1's basic financial statements. The District's basic financial statements are comprised of two components: 1) government-wide financial statements, 2) fund financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements: The government-wide financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private-sector business. The government-wide financial statements present information for the governmental activities and the business-type activities.

The statement of net position (see page 3) presents information on all of the District's assets, liabilities, and deferred inflows with the difference between the three reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The statement of activities (see page 4) presents information showing how the government's net position changed during the most recent fiscal year. All changes in net position are reported on the accrual basis as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods.

Fund financial statements: A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other state and local governments, uses fund accounting to demonstrate compliance with finance-related legal requirements. All of the funds of the District can be divided into two categories: governmental funds and proprietary funds.

Governmental funds: Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements. The financial statements presented for the governmental funds are the balance sheet and the statement of revenues, expenditures and changes in fund balances.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

Durango West Metropolitan District No. 1 has two governmental funds: the General Fund and the Conservation Trust Fund. The District considers both of these funds important to financial statement uses and has presented them as major funds.

Proprietary Funds: Proprietary fund accounting uses the same basis of accounting as private-sector business enterprises. Under this method of accounting, an economic resources measurement focus and an accrual basis of accounting is used. Revenue is recorded when earned. Expenses are recorded when incurred in both the funds and government-wide financial statements. The District has three enterprise funds: the Water Fund, the Sewer Fund and the Wastewater Treatment Fund which use proprietary fund accounting.

The proprietary fund basic financial statements include a statement of net position, a statement of revenues, expenses and changes in fund net position, and a statement of cash flows.

The statement of net position presents information on the assets, liabilities and net position of the District's proprietary funds. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the two enterprise funds is improving or deteriorating.

The statement of revenues, expenses and changes in fund net position reports the operating revenues and expenses and non-operating revenues and expenses of the District's two enterprise funds for the year; the operating income (loss) is combined with any capital contributions and transfers to determine the change in net position for the fiscal year.

The statement of cash flows reports cash and cash equivalent activities of the two enterprise funds for the fiscal year resulting from operating activities, non-capital and related financing activities, capital and related financing activities, and investing activities. The net result of these activities added to the beginning of the year cash balance total to the cash and cash equivalent balance at the end of the current year.

Other Information: The District adopts an annual appropriated budget for each of its funds. Budgetary comparison schedules have been provided for the General Fund and the Lottery Fund as required supplementary information in the financial statements; the schedules of revenues and expenses, budget to actual for the Water Fund, Sewer Fund and Wastewater Fund are presented as supplementary information.

FINANCIAL POLICY PRIORITIES

The financial goal of the District is to operate in a cost-efficient manner that is similar to the practices of private enterprise. The District annually reviews its financial policies to assess their impact upon financial activities. Policies that affected financial activities are:

- 1. Growth pays its own way
- 2. Debt service may be funded from user fees, property taxes, or special assessments
- 3. Administration and operations are funded from user fees.

Day-to-Day Operational Control of the District

For operational control, the District has segmented its budget into 5 categories: General Fund, Conservation Trust (Lottery) Fund, Water Fund, Sewer Fund and Wastewater Treatment Fund. This allows the District to easily track its operations.

The General Fund is used to account for roads, common areas, office facility, and general administration. The major sources of revenue are monies collected for snow removal, general administration, property taxes, and specific ownership taxes. In 2017 the District did not certify a mill levy for property taxes since general obligation bonds taken out in 2006 for a road rehabilitation project were paid in 2016. The District did not request tax payer authorization for a mill levy in 2017. In 2017, the General Fund's revenues from user fees were \$144,583. In 2016, principal and interest paid by the General Fund on the outstanding bonds was \$-0-.

At December 31, 2017, the La Plata County Treasurer was holding \$93,960 for prior collected tax assessments. Funds will be released when past due audits are submitted to the state.

The Lottery Fund is designated to receive and hold state lottery funds which can only be used for parks and recreation projects. At December 31, 2017, \$6,456 was being held.

The District operates its water and sewer funds as self-supporting enterprises. Revenues received from user fees are expected to be sufficient to cover the day-to-day operating expenses of the sewer fund, but a shortage of operating fees for the water fund was expected in 2017. In 2017 major repairs and upgrades were in process for facilities in the Wastewater Treatment Fund, which resulted in new debt to complete the project in 2018. The new debt is funded by an increase in user fees allocated to the Wastewater Fund. In 2017 the enterprise funds for the District had \$434.285 in user fees, and expenses of \$508,906 for water, sewer and wastewater operations.

Government-wide Financial Analysis

The following tables present condensed 2017 and 2016 financial information for the District.

Table A is a summary of the statement of net position. The District's position (the difference between assets, liabilities and deferred inflows) are one way to measure the financial health of the District. Increases or decreases in the District's net position are indicators of improving or deteriorating financial health. This, coupled with factors such as population growth, legislative changes or policy changes, provide an integrated assessment of the District's position.

Table B shows revenues, expenses, and changes in net assets for 2016 and 2017.

Table A shows that the District's net position has increased. Total restricted net position of \$6,486 is restricted for Tabor. Unrestricted net position increased from \$702,071 in 2016 to \$1,043,201. This unrestricted net position is available for future appropriations. Net position invested in capital assets increased by \$11,077 from 2016.

Table B shows an operating loss of \$153,023 for 2017. This is an increase of \$79,858 from 2016. This increase is primarily due to the fact that in 2017, the District's increased investment in fixed assets.

General revenues may be used to retire debt service, purchase capital assets, and to supplement operating revenues. General revenues decreased by \$105,084 in 2017. This is primarily due to having no property tax revenues for debt service in 2017.

The change in net position in the business-type activities decreased by \$73,458 from 2016 to 2017.

FUTURE CAPITAL IMPROVEMENTS

At the end of 2017 wastewater plant improvements were not complete and are estimated to be completed in 2018. An additional grant for community in need of approximately \$80,000 was secured after the \$158,000 was secured.

A new 15-year loan for \$900,000.00 from a local bank was approved by the Districts and secured at a fixed interest rate beginning in 2017.

<u>Fire Safety</u>: The District has concentrated on various fire mitigation efforts to lower the risk of wild fire due to several drought years within the past decade. The District has considered mobile burn units to deal with slash and fire mitigation debris. Renting this type of equipment is likely the most economical cost to benefit for the District, however, used units remain an option to consider.

The District maintains ownership in and a board member seat on Lake Durango Water Authority. The majority of the District's water supply is purchased as treated water from this Authority. A new water line from Nighthorse Reservoir was in process of being tested and placed on line in 2017. Water from Nighthorse comes from the Animas La Plata Project, which has been in progress since the 1950s. The Authority will receive supplemental water from the reservoir to increase raw water supply. The District should not need to contribute to the costs of the new pipeline from Nighthorse reservoir, yet if Lake Durango Water Authority has overestimated growth revenues the District could be required to contribute along with other customers based on an equitable basis for debt service shortfalls. This remains a possibility until the Authority's financials indicate the new pipeline will not be reliant on existing customer revenues.

CONTACTING THE DISTRICT'S MANAGER

This financial report is designed to provide our citizens, customers, investors, and creditors with the general overview of the District's finances and demonstrates the District's accountability for the money it receives. If you have any questions concerning this report or need additional information please contact Janet Anderson, Manager of the Durango West Metropolitan District No. 1, 119 Holly Hock Trail, Durango, Colorado, (970) 259-4267, dw1@mydurango.net.

Durango West Metropolitan District No. 1

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities For the Year Ended December 31, 2017

Net change in fund balances - total governmental funds:	\$ 76,030
Amounts reported for Governmental Activities in the Statement of Activities are different because:	
Governmental funds report outlays for capital assets as expenditures because such outlays use current financial resources. In contrast, the Statement of Activities reports only a portion of the outlay as expense. The outlay is allocated over the assets' estimated useful lives as depreciation expense for the period. This is the amount by which capital outlay of \$3,793 was less than depreciation of \$66,815 in the current period.	(63,022)
Governmental funds report debt proceeds, including lease purchase agreements, as current financial resources. In contrast, the Statement of Activities treats such issuance of debt as a liability. Governmental funds report repayment of principal as an expenditure, In contrast, the Statement of Activities treats such repayments as a reduction in long-term liabilities. This is the amount by which repayments was less than proceeds.	(50,000)

Durango West Metropolitan District No. 1 Notes to the Financial Statements December 31, 2017

Note 1 Definition of Reporting Entity

The Durango West Metropolitan District No. 1 (the District) was created on July 20, 1978, pursuant to the provisions of the Colorado Revised Statutes as applicable to special districts. As such, the District's board of directors is the governing authority and the District provides a complete water and sewage system for its constituents, along with road maintenance and snow removal.

The reporting entity consists of the District and, if applicable, organizations for which the District is financially accountable. The District is considered financially accountable for legally separate organizations if it is able to impose its will on that organization or there is a potential for the organization to provide specific financial benefits or impose specific financial burdens on the District. Consideration is also given to including other organizations in the reporting entity if they are considered fiscally dependent or exclusion from the District's financial statements would render those financial statements misleading.

Based on these criteria, no potential component units have been included in the District's reporting entity, nor is the District a component unit of another entity.

Note 2 Summary of Significant Accounting Policies

The financial statements of the District have been prepared in accordance with generally accepted accounting principles (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The more significant of the District's accounting and reporting principles and practices are described below.

Government-Wide and Fund Financial Statements

The basic financial statements include both government-wide (based on the District as a whole) and fund financial statements. The government-wide financial statements, which include the statement of net position and the statement of activities, report information on all the activities of the District. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The government-wide statement of activities demonstrates the degree to which the direct expenses of a functional category or activity are offset by program revenues. Direct expenses are those that are clearly identifiable with a function or activity. Program revenues include (1) charges to customers or applicants who purchase, use or directly benefit from goods, services or privileges provided by a given function or activity; (2)

grants and contributions that are restricted to meeting the operational requirements of a particular function or activity; and (3) grants and contributions that are restricted to meeting the capital requirements of a particular function or activity. Taxes and other items not properly included among program revenues are reported instead as general revenues. The net cost by function or business-type activity is normally covered by general revenue such as property taxes or other unrestricted revenues.

Separate fund financial statements are provided for governmental funds and proprietary funds. Major individual governmental funds and major individual enterprise finds are reported in separate columns. The government-wide focus is more on the sustainability of the district as an entity and the change is aggregate financial position resulting from the activities of the fiscal period. The focus of the fund financial statements is on the major individual funds of the governmental and business-type categories. Each presentation provides valuable information that can be analyzed and compared to enhance the usefulness of the information.

Measurement Focus, Basis of Accounting and Basis of Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the fund financial statements for the proprietary funds. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Property taxes are recognized as revenues in the year for which they are levied, while grants and similar items are recognized as revenue when all eligibility requirements are met. Direct expenses are those that are clearly identifiable with a specific program or function. Program revenues include (a) charges to customers or applicants who purchase, use or directly benefit from goods, services, or privileges provided by a given function or program and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or program. Revenues that are not classified as program revenues, including all taxes and other items, are presented as general revenues.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when they are both measurable and available. Revenues are considered available when they are collected within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the District considers revenue to be available if collected within 60 days of the end of the fiscal year. Expenditures generally are recorded when a liability is incurred as is the case with accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, if any, are recorded only when the liability has matured and payment is due. General capital asset and acquisitions are reported as expenditures in governmental funds while proceeds of long-term debt and acquisitions under capital leases are reported as other financing sources.

Property taxes, grant and entitlement revenues, interest and charges for services are considered revenues susceptible to accrual. Contributions and miscellaneous revenue are recorded as revenues when received in cash because they are not generally measurable until received in cash. In applying the susceptible to accrual concept to intergovernmental revenues, the legal and contractual requirements of the individual programs are used as guidance. Generally, entitlements and shared revenues are recorded at the time of receipt or earlier if the accrual criteria are met.

Business-type activities and all proprietary funds are accounted for using the flow of economic resources measurement focus. With this measurement focus, all assets and liabilities associated with the operation of these funds are included on the statement of net position. Proprietary fund-type operating statements present increases (revenues) and decreases (expenses) in total not position. Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operation. The principal operating revenues of the District's water, sewer and wastewater funds are charges to customers for sales and services. Operating expenses for the enterprise funds include the cost of sales and services, administrative expenses and depreciation of capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

Governmental Funds

The District reports the following major governmental funds:

• The general fund is the primary operating fund of the District and is always classified as a major fund. The general fund is used to account for all financial resources of the District except those required to be accounted for in a separate fund. Major revenue sources include property taxes, along with charges for services. Primary expenditures include general government and public services.

Proprietary Fund Types

The following is a description of the major proprietary funds of the District:

- The water fund accounts for the operation of the District's water system.
 Activities of the fund include operation and maintenance of the water system.
 Costs are financed
- The sewer fund accounts for the operation of the District's sewer system.
 Activities of the fund include operation and maintenance of the system. Costs are financed through charges for services to users and rates are reviewed regularly and adjusted as necessary.

• The wastewater fund is the newest fund for the District. On May 28, 2015, Durango West Metropolitan District No. 1 signed an intergovernmental agreement and service contract with Durango West Metropolitan District No. 2 (DWMD#2). The two districts each own 50% of the wastewater treatment plant and effective May 28, 2015, each district accounts for 50% of the operations on their respective financial statements.

Cash and Cash Equivalents

Cash and cash equivalents consists of interest and non-interest bearing demand deposits and Colorado Local Government Liquid Asset Trust (COLOTRUST) investment pool. The District's investments in the COLOTRUST investment pool are not reported at amortized cost because COLOTRUST is an external investment pool that is not registered with the SEC as an investment company, but has a policy that it will and does operate in a manner consistent with the SEC's Rule 2a7 of the Investment Company Act of 1940. Rule 2a7 allows SEC-registered mutual funds to use amortized cost rather than market value in computing share prices if certain conditions are met. The regulatory oversight for the COLOTRUST pool rests with the Colorado Securities Commission and the fair value of the District's investments in the COLOTRUST investment pool is the same as the value of the pool shares.

For purposes of the statement of cash flows, all highly liquid investments, if any, with a maturity of three months or less when purchased are considered cash equivalents.

Inventories

The District, over the years, has allowed mobile homes to be set on various lots. Over time, some of the mobile homes have deteriorated to the point that the current owner will not incur the costs to upgrade the property. The District will purchase the lot and mobile home with the intent of removing the mobile home and building houses for resale. During 2016, the District purchased three lots, removed the mobile homes, and began building three new homes.

As of year-end, one of the homes was virtually completed with the other two homes still under construction.

One of the homes was sold during 2018.

Property Taxes

The District will not have a mill for 2016 and future years, so no property tax accruals will be reflected on the financial statements.

Capital Assets

Capital assets, which include land, roads, infrastructure, utility plant wells and tanks, transmission and distribution systems and equipment, are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. The District's basic policy for capitalization includes a minimum useful life of three years and a dollar threshold of \$2,500. The criteria for capitalization also

includes (1) increasing the capacity or operating efficiency or (2) extending the useful life of the asset. These levels and criteria were set so as to maintain a balance between accountability and managing the costs of recording and tracking these assets. Capital assets are recorded at cost or estimated historical cost if purchased or constructed. Contributed capital assets are recorded at estimated fair value at the time received. Normal maintenance and repair that do not add to the value of the asset or materially extend the useful life of the asset are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed when material. No interest was capitalized in relation to capital assets and improvements during the year ended December 31, 2017.

Capital assets of the District are depreciated using the straight-line method over the following useful lives:

_	Governmental Activities	Business-Type Activities
Buildings	10-25	-
Roads	10-25	-
Infrastructure	40	50
Utility Plant Wells and Tanks	-	15-50
Transmission and Distribution	-	10-50
Equipment	10	10

Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The District has no amounts that qualify as deferred outflows of resources.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The government has only one type of item which arises only under a full accrual basis of accounting that qualifies for reporting in this category. Accordingly, the item, unavailable revenue, is reported only in the statement of net position.

Long Term Liabilities

In the government-wide statement of net position and the fund financial statements for the proprietary funds, long-term obligations are reported as liabilities in the applicable statement of net position. Bond premiums and discounts are deferred and amortized over the life of the obligation using the interest method. Bond issue costs are recognized in the period incurred.

In the governmental fund financial statements, bond premiums and discounts, as well as bond issue costs, are recognized during the current period. The face amount of the debt issue, along with the related discount or premium, if any, is reported as other financing sources, while debt issue costs are reported as debt service expenditures.

Fund Balances/Net Position

Governmental funds report fund balance classifications based primarily on the extent to which the District is bound to honor constraints on the specific purposes for which amounts in the funds can be spent. Fund balance for the District's governmental funds consists of the following:

Nonspendable – includes amounts that are (a) not in spendable form or (b) legally or contractually required to be maintained intact. The "not in spendable form" criterion includes items that are not expected to be converted to cash such as inventories, prepaid items and long-term notes receivable.

Restricted – includes amounts that are restricted for specific purposes stipulated by external resource providers constitutionally or through enabling legislation.

Committed – includes amounts that can only be used for the specific purposes determined by the passage of a resolution of the District's board of directors. Commitments may be modified or changed only by the District's board of directors approving a new resolution.

Assigned – includes amounts intended to be used by the District for specific purposes that are neither restricted nor committed. Intent is expressed by the District's manager to which the assigned amounts are to be used for specific purposes as outlined by the board of directors' approval of a budgetary deficit in the subsequent year's budget.

Unassigned – this is the residual classification for the general fund.

In the government-wide and proprietary fund financial statements, net position is classified in the following categories:

Net investment in capital assets – this classification consists of capital assets net of accumulated depreciation and reduced by outstanding related debt that is attributed to the acquisition, construction or improvement of capital assets.

Restricted net position – this classification consists of restrictions created by external creditors, grantors, contributors, laws or regulations of other governments, enabling legislation and constitutional provisions.

Unrestricted net position – this classification represents the remainder of net position that does not meet the definition of "net investment in capital assets" or "restricted net position".

Restricted Resources

When both restricted and unrestricted resources are available for use, it is the District's policy to use unrestricted resources first and then use restricted resources as they are needed.

Interfund Transactions

Interfund transactions are accounted for as revenues, expenditures or expenses. Transactions that constitute reimbursements to a fund for expenditures/expenses initially made from it that are properly applicable to another fund are recorded as expenditures/expenses in the reimbursing fund and as a reduction of expenditures/expenses in the fund that is reimbursed. All other interfund transactions are reported as interfund transfers.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Note 3 Cash, Cash Equivalents and Investments

Cash, cash equivalents and investments shown on the books are summarized as follows:

Demand Deposits – Unrestricted	\$ 337,391
Demand Deposits – Restricted	331,476
COLOTRUST – Unrestricted	9,821
COLOTRUST – Restricted	5,595
	\$ 684,283

Restricted Cash and Investments

Restrictions on cash and investments include a restricted account established to hold Tabor reserves, an account that holds bond proceeds to be used for road improvement purposes and two accounts that hold Conservation Trust Fund proceeds in the Lottery Fund.

Custodial Credit Risk

At December 31, 2017, the carrying amount of the District's deposits was \$128,139 and the bank balance was \$128,139. Of the bank balance, \$128,139 was covered by federal deposit insurance. Colorado law requires that depository institutions must apply for and be designated as an eligible public depository before the institution can accept public fund monies. The depository institution must pledge eligible collateral as security for all public deposits held by that institution that are not insured by depository insurance. The fair value of the collateral that each institution pledges as security must be equal to at least 102% of the total uninsured deposits held by that institution. Generally, the eligible collateral in the collateral pools is held by the depository institution or its agent in the name of the depository institution. The above amount does not include the \$540,728 held by District No. 2.

Custodial credit risk is the risk that in the event of a bank failure, the District's deposits may not be returned to the District. The District does not have a policy for custodial credit risk.

Investments

The District is subject to Colorado Revised Statute 24-75-601 which is entitled "concerning investment in securities by public entities". This statute, among other things, outlines the type of securities that public entities in Colorado may acquire and hold as investments. These include U.S. government and agency securities, certain bonds of political subdivisions, bankers acceptances, commercial paper, local government investment pools, repurchase agreements, money market funds, guaranteed investment contracts and U.S. dollar-denominated corporate or bank debt. The statute also includes a provision limiting any investment to a five year maturity unless the governing body authorizes a longer period or other exceptions apply. At December 31, 2017, the District's investments consisted of its COLOTRUST holdings whose fair value approximates cost and whose investment maturity in years is less than one year. The year-end value was \$15,416.

Interest Rate Risk

The District does not have a formal policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Credit Risk

The District has no investment policy that would limit its investment choices more strictly than state law. As of December 31, 2017, the District's investment in COLOTRUST is rated AAAm by Standard and Poor's.

Note 4 Receivables

Receivables at December 31, 2017 consist of the following:

Governmental Activities	General Fund	Lottery Fund	Total
Customer Accounts, Current Net of Allowance Highway User Funds Department of Local Affairs	\$ 29,236 3,315	\$ - - 6,456	\$ 29,236 3,315 6,456

Customer Accounts, Current Allowance for Uncollectibles	\$	37,892 (3,922)	\$	30,116 (3,145)	\$	-					
Net Receivables	\$	33,970	\$	26,971	\$						

The receivable from the Department of Local Affairs represents 2017 lottery proceeds which are also being held until the District's audits are current.

Note 5 Interfund Receivables/Payables and Transfers

The following interfund receivables and payables are included in the individual fund financial statements at December 31, 2017:

1	Advances		Advances		Advances	Advances
]	To (From)	T	o (From)	To (From)		To (From)
	General		Lottery		Water	Sewer
Fund		Fund			Fund	Fund
\$	-	\$	37,475	\$	137,689	\$ (426,522)
	(37,475)		-		-	-
	(137,689)		-		-	-
	426,522		-		-	
\$	251,358	\$	37,475	\$	137,689	\$ (426,522)
	7	To (From) General Fund \$ - (37,475) (137,689) 426,522	To (From) T General Fund \$ - \$ (37,475) (137,689) 426,522	To (From) General Fund S - (37,475) (137,689) 426,522 To (From) Lottery Fund - (137,689)	To (From) To (From) To General Lottery Fund Fund \$ - \$ 37,475 \$ (37,475) - (137,689) - 426,522 -	To (From) To (From) To (From) General Lottery Water Fund Fund \$ - \$ 37,475 \$ 137,689 (37,475) - - (137,689) - - 426,522 - -

The amounts reported as due from other funds and due to other funds are reflective of the time lag between the dates that (1) interfund goods and services are provided or reimbursable expenditures occur; (2) transactions are recorded in the accounting system; and (3) payments between funds are made. All amounts reflected as due from other funds are expected to be collected in the subsequent year.

The advances due the water and sewer funds were for operating subsidy support. It is expected that these advances will be repaid in more than one year.

Note 6 Tower Lease

On July 30, 2013, the District entered into a lease agreement with Atmos Energy Corporation (Atmos) to rent them tower and antenna space. The District will receive monthly rental income of \$500 which will be increased by 3% at the yearly anniversary of the commencement date as long as the lease and/or any renewal terms are in effect. In addition, there will be an electricity charge of \$75 per month. The lease is or a term of 60 months with renewal terms of three additional terms of 60 calendar months.

Note 7 Capital Assets and Depreciation

Capital asset activity for the year ended December 31, 2017 was as follows:

Business-Type Activities Bonds Payable Series 2017 Waste Water Bonds	\$		\$ 450,000	\$	_	\$	450,000	\$	32,500
Total Business-Type Activities	\$	-	\$ 450,000	\$	-	\$	450,000	\$	32,500

The above-described obligation is serviced by the District's Wastewater Fund in conjunction with Durango West Metropolitan District No. 2.

The following is a description of the series 2017 wastewater revenue bond:

\$450,000 series 2017 wastewater revenue bond; interest rate of 3.18%; due in quarterly principal and interest payments ranging from \$7,957 to \$35,379 beginning June, 2018 through June, 2032; collateralized by an irrevocable lien but not necessarily an exclusive lien on the net revenue of the wastewater system.

\$ 450,000

The debt service requirements for the series 2017 wastewater revenue bonds are as follows:

Year Ending December 31,	Principal	Interest		_Total
2018	\$ 32,500	\$	19,637	\$ 52,137
2019	25,000		12,959	37,959

Total	\$ 450,000	\$	168,005	\$ 618,005

Note 9 Net Position

Restricted net position represents net position whose uses are subject to constraints that are either (1) legally imposed by creditors (such as debt covenants), grantors, or laws or regulations of other governments, or (2) imposed by law through constitutional provisions or enabling legislation. Restricted net position at December 31, 2017 for governmental activities is \$6,486 which has been restricted for Tabor. This represents approximately 3% of the District's 2017 fiscal year spending as that term is defined in the Colorado constitution. Under these provisions of the constitution, this portion of the District's net position can be used for declared emergencies only and the District must maintain 3% or more of its fiscal year spending in this restricted account.

Note 10 Joint Venture

The District's participation in the Colorado Special Districts' Property and Liability Pool (the Pool) is a joint venture between the Special District Association of Colorado and various special districts in Colorado. The Pool provides property and general liability, automobile physical damage and liability, public officials' liability, inland marine, money and security, and boiler and machinery coverage to its members. Durango West Metropolitan District No. 1 has not had losses of a material amount in any of the preceding three years. The District does not know its percentage share of the joint venture.

The Pool has contracted with other third parties to operate, administer and manage the Pool. The Pool is responsible for its own budgets. In the event aggregated losses incurred by the Pool exceeds amounts recoverable from the reinsurance contracts and capital and surplus accumulated by the Pool, the Pool may require additional contributions from the Pool members. The Pool issues a publicly available annual financial report that includes financial statements and supplementary information. That report may be obtained by calling the Colorado Special District Association at (303) 863-1733 in the Denver metropolitan area and (800) 866-1733 from outside the metropolitan area.

The joint venture summary audited financial information as of December 31, 2015, is as follows:

Admitted Assets	\$ 44,054,744
Liabilities Surplus Total Liabilities and Surplus	\$ 24,739,781 19,314,963 \$ 44,054,744
Revenues Expenses Net Income	\$ 16,561,452 14,839,993 \$ 1,721,459

Note 11 Risk Management

The District is exposed to various risks of loss related to torts; thefts of, damages to, or destruction of property; error or omissions; injuries to employees; or acts of God. Risks of loss from property and liability coverage are covered by the District's participation in the Colorado Special District's property and liability pool which is a separate independent governmental public entity risk pool formed through intergovernmental agreement by member special districts to provide defined liability and property coverage. The aggregate limit of losses paid by the pool for property claims is limited to \$1,000,000 with commercial company reinsurance covering any losses in excess of that amount up to \$3,000,000. All other risks of loss are handled by the purchase of commercial insurance. In addition, settled claims have not exceeded commercial insurance coverage in any of the three preceding years.

Note 12 Tax Spending and Debt Limitations – Taxpayers Bill of Rights (TABOR)

In 1992, Colorado voters passed an amendment to the state constitution which contains several limitations, including revenue raising, spending abilities and other specific requirements affecting state and local governments. The amendment, which is commonly known as the Tabor amendment, is complex and subject to judicial interpretation; however, the District believes it is in compliance with the requirements of the amendment. In November, 1997, the voters of the District approved the District's request to retain and spend all revenues and other funds collected from any source. As such, the fiscal year spending limitations outlines in the amendment no longer apply to the District, but the District is subject to other provisions of the amendment.

Note 13 Contingencies and Commitments

Previously, the District entered into an intergovernmental agreement with Durango West Metropolitan District No. 2 (District No. 2) to construct and operate a wastewater treatment plant for the residents of both districts. The District agreed to purchase all wastewater treatment services from District No. 2 and during 2015, the District paid \$60,960 for treatment services. When the loan agreement with Colorado Water Resources and Power Development Authority was fully paid and satisfied in 2011, the intergovernmental agreement was amended to include a joint ownership provision of the wastewater plant; however the amended intergovernmental agreement had an expiration date of December 31, 2012. The two districts completed and approved a newly amended intergovernmental agreement on May 28, 2015. Each district now owns one-half of the treatment plant.

The District is late in submitting its audited financial statements for 2016 to the State of Colorado. As a result of this late filing, tax revenues for 2015 and 2016 are being held by La Plata County. These taxes, along with any other taxes subsequently collected, are being held until all required audited financial statements have been submitted to the State of Colorado. In addition, Conservation Trust Fund distributions for 2015 in the amount of \$607, as well as any future distributions, are being held by the Department of Local Affairs.

The 2017 audit is now out of compliance because the audit has not been timely filed. As of December 31, 2018, La Plata County and the Department of Local Affairs were holding \$93,960 and \$3,701 respectively until these audits are filed with the State of Colorado.

During 2018 the 2016 audit was filed with the State Auditor's Office. As a result, the property taxes and the Department of Local Affairs funds as of December 30, 2016 were released with the District receiving those dollars.

Due to the amount of cash used to buy three lots, demolish the existing structures on those lots, and pay ordinary and necessary expenses, during November, 2016, it became apparent that the District would not be able to cash flow the operations and the additional costs of building three new homes. As a result, the Board, during their November meeting, authorized the Executive Director to obtain a line of credit with a local bank. The line cannot exceed \$200,000, is to be secured by real estate, with the interest rate to be determined. Subsequent to year-end, the Executive Director did obtain a line of credit.

As of December 31, 2017, \$50,000 had been advanced against the line of credit. Security consists of District property. The line of credit expires December 31, 2018. The line of credit was extended until December 31, 2019. The current interest rate is 6.75%.

The Sewer Fund overspent its budget which may be a violation of Colorado Revised Statues.

Durango West Metropolitan District No. 1 Notes to Required Supplementary Information December 31, 2017

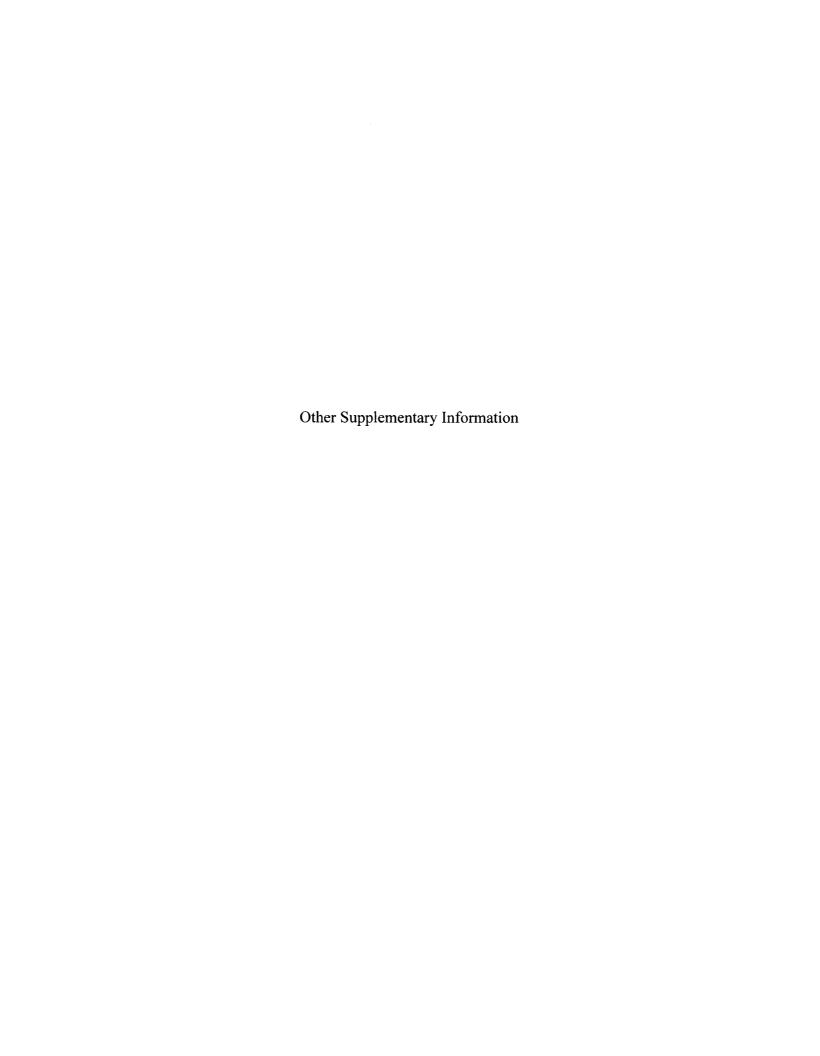

Budgets and Budgetary Accounting

Annual budgets are established by the District as required by Colorado law. The budget has been prepared using the cash basis of accounting, which differs from the modified accrual basis used for financial statement preparation. Reconciliations, if necessary, between the budget basis and generally accepted accounting principles (GAAP) are presented on the face of the budget comparison schedules.

Expenditures may not legally exceed appropriations at the fund level. After budget approval, the District's Board of Directors may approve supplemental appropriations if an occurrence, condition, or need exists that was not known at the time the budget was adopted. No supplemental appropriations were made for 2017.

On or before October 15 of each year, the District's budget officer must prepare and submit a proposed budget to the Board for the next fiscal year. Thereupon, notice must be published stating, among other things, that the budget is open to inspection by the public and that interested electors may file or register any objection to the budget. Subject to certain exceptions and exclusions discussed hereafter, the District must submit a request for property tax increases in excess of the statutory limitation to the Division of Local Government (if within TABOR limits, as described in Note 9) or submit the question of an increased levy directly to the electors of the District at a general or special election. State law requires that the District adopt a budget prior to the certification of its mill levy to the county and file a certified copy of its budget with the Division of Local Government within 30 days of such adoption. Failure to do so can result in the withholding by the county treasurer of any property tax revenues that may be levied in the future by the District, pending compliance. The District timely filed the certified copy of its budget for the year ended December 31, 2017.

Budget appropriations lapse at the end of each year.
